Chapter 1
Introduction

1-1. Purpose
This regulation prescribes local policy and procedures governing the possession and control of animals maintained on this installation and implements measures necessary to protect the health and safety of their dependents, and their animals residing on the installation. It applies to military personnel assigned or attached to units on Fort Campbell, residents, and visitors to this installation.

1-2. References
a. AR 40-1 (Composition, Mission, and Functions of the Army Medical Department) Dated 1 July 1983.
b. AR 40-905 (Veterinary Health Services) dated 29 Aug 2006.
c. Title 40, Section 291, U.S. Code.
d. Compendium of Animal Rabies Control.
e. U.S. Army Veterinary Medical Standardization Board Vaccination Guidelines 5 August 2013.

1-3. Prescribed Forms
a. DD Form 2208—Rabies Vaccination Certificate, Prescribed in (Registration of Animals 3-3).
c. DD Form 2623—Animal Home Quarantine, Prescribed in (Incidents involving Animal Bites/Scratches 4-2).

1-4. Applicability
a. All animals brought onto or maintained on the installation are included within the meaning of this directive. The privilege of maintaining a privately owned animal while residing on the Fort Campbell installation is contingent on the animal's continuing ability to live harmoniously within the military community. Violations of this regulation may result in the withdrawal of the privilege of maintaining a privately owned animal. The privilege may also be withdrawn when the animals continued presence constitutes a threat to the health or safety of the community or if the animal is determined to be a nuisance. Violations of this regulation by military personnel may subject the offender to disciplinary action under the provisions of the Uniform Code of Military Justice (UCMJ).
b. This regulation is punitive in nature and applies to all military personnel, their Family members, civilians, customers, partners, and contractors who perform duties, reside, utilize facilities, and or enter and travel on the installation. A violation of any such provision is separately punishable as a violation of a lawful general regulation under Article 92, Uniform Code of military justice. Penalties for violating any of these provisions include the full range of statutory and regulatory sanctions, both criminal and administrative and do not preclude prosecution of military personnel under other regulations, provisions of the Uniform Code of military justice, or other laws, when such prosecution is appropriate. Violations by civilian employees may be the basis for appropriate disciplinary action and civilian offenders may be removed from this installation, denied re-entry and prosecuted for violating the exclusion order.

1-5. Proponent
The proponent and point of contact for this regulation is Veterinary Services, Fort Campbell, KY 42223.

Chapter 2
General Responsibilities

2-1. Installation Veterinarian
The Installation Veterinarian, or designated representative, will—
a. Provide preventive veterinary and surgical care to DOD-owned animals. DOD-owned animals include Military Working Dogs and unit mascots (established by unit orders, signed by an officer in the rank of LTC or higher).
b. Provide preventative veterinary care to NAF-owned animals as resources allow, on a reimbursable basis.

c. Provide veterinary care to animals at the Stray Animal Impound Facility.

d. Register privately owned dogs, cats, and horses.

e. Provide veterinary services to privately owned animals in accordance with AR 40-905, this regulation and Public Health Command directives and subject to the availability of personnel. Medical care is limited to vaccinations, routine health care, issuance of health certificates, and minor ailments. Cases involving more extensive care and/or nonzoonotic diseases are referred to a civilian veterinary clinic. Veterinary care is authorized for pet owners possessing a valid military ID card and who are enrolled in the Defense Enrollment/Eligibility Reporting System (DEERS).

f. Perform spays and neuters on privately-owned pets including those that have been adopted at the Stray Animal Impound Facility.

g. Perform emergency procedures on privately-owned pets to prevent undue suffering or to save the life or limb of animals, prior to referring such cases to a civilian practitioner.

h. Evaluate reported cases of animal abuse or neglect.

i. Perform inspections of kennels, runs, stables, corrals, and other animal facilities on the installation.

j. Complete Animal Bite Report cases initiated by the hospital. Examine and monitor all animals placed on quarantine involved in an on-post bite incident.

k. Provide examinations of privately owned animals for owners requesting authorization to become Family Community Care Providers.

l. Assist Campbell Crossing LLC in initiating procedures for removal of an animal from the installation which poses a threat to the community or which was involved in a biting incident for a second time within a six-month period, or upon investigation of a serious bite. A "serious bite" is one where the injury requires surgical repair or a hospital admission. Nothing in this regulation limits the authority of the Garrison Commander to direct the removal of an animal from the installation that is deemed to pose a serious risk to the safety or welfare of the Fort Campbell military community.

m. Provide appointment availability to new occupants of government quarters that own animals to ensure that the animals are properly registered in a timely manner.

n. Perform temperament assessments on specialty animals to include guide dogs for the blind, hearing dogs, and other handicap assistance and/or service animals.

2-2. Campbell Crossing LLC

Campbell Crossing LLC or its designated representative will--

a. Inform tenants of general policies regarding pet ownership on post upon assignment of quarters. A current electronic copy of this regulation will be provided to all occupants of government quarters on the installation who own animals that are required to be registered. These owners will also be advised by Campbell Crossing, LLC at the time of quarter's assignment of the benefits of procuring liability insurance to cover the costs related to the actions of their pets.

b. Respond to complaints of suspected animal abuse or neglect by contacting the Fort Campbell Police to ensure formal documentation and investigation.

c. Notify the Fort Campbell Police in cases of animal neglect, abuse, abandonment, or complaints that an animal is a nuisance or threat to the health and safety of the community.

d. Inform new Residents of their responsibility to properly microchip and register their pets with the Installation Veterinarian. Upon completion they also may be asked to return a copy of pet registrations to their assigned Community Office.

e. Initiate letters of warning to pet owners for violations of this regulation, and when warranted, initiate procedures to have an animal removed from the installation.

f. Approve requests for fencing in accordance with CCLLC Resident Guide and Fencing Guidelines.

Dog Kennels are not an authorized means of maintaining dogs in On-Post housing.

2-3. Directorate of Public Works

The Directorate of Public Works, or designated representative, will--

a. Coordinate with the Installation Veterinarian to euthanize injured wild animals when necessary to eliminate suffering.

b. Remove and control wild animals that become pests on the installation (i.e., skunks, raccoons, opossums, deer, etc.).
2-4. Directorate of Emergency Services/Installation Provost Marshal
The Directorate of Emergency Services /Installation Provost Marshal (Military Law Enforcement) will--

a. Respond to reports of stray animals and wild animals in areas such as military family housing, barracks, and administration/office areas to protect personnel from uncontrolled and wild animal contact.

b. Notify pest control or other installation animal control personnel, as appropriate. If possible, safely restrain the animal until properly trained and equipped personnel arrive to capture and remove it.

c. Use appropriate force, including lethal force, as necessary, when an animal appears to be sick or its behavior is erratic and not typical, e.g., when it is aggressive or attacks without provocation and cannot be restrained without possible injury to military law enforcement or installation personnel. If the animal is suspected of being rabid, and lethal force is necessary, avoid damage to the brain to allow subsequent testing to confirm rabies status.

d. Provide secure storage for and issuance of weapons and munitions to pest control or other animal control personnel who are authorized to use weapons for darting or shooting uncontrolled cats or dogs or wild animals.

e. Provide training and validation qualifications for pest control and other animal control personnel who may be required to shoot animals to ensure that these individuals are proficient in the use of weapons and can accurately hit the target.

f. Provide oversight when shooting or darting operations are to be conducted to ensure public safety.

2-5. Director, Family, Morale, Welfare and Recreation
The Director, Family, Morale, Welfare and Recreation, or designated representative, will--

a. Remove horses that pose a health threat to other animals or persons.

b. Authorize organized horseback night rides.

c. Give permission to conduct trail rides, horse shows, or other group activities.

d. Give approval to bring horses onto the installation.

e. Provide and assign quarantine space for horses to be stabled on post.

f. Notify the Installation Veterinarian and/or civilian veterinarian for emergency veterinary care as deemed necessary by the Stables Manager (reasonable efforts will be made to contact owners prior to providing emergency care).

g. Maintain a waiting entrance list, a seniority roster, and an improvement move roster on a current basis.

h. Move any horse to a pasture or stall when the safety or health of that horse becomes endangered or threatened.

i. Determine the maximum number of stalls authorized to each Family.

j. Determine the quantity and correct mixing of feed for all horses in coordination with the Installation Veterinarian.

k. Feed all horses the standard diet prescribed twice a day unless otherwise directed by the Installation Veterinarian or requested in writing by the privately owned horse owner.

l. Operate MWR dog boarding kennels.

m. Maintain all stables and boarding kennels in sanitary conditions approved by the Installation Veterinarian.

n. Stable manager will verify entry of horse into quarantine and will forward required documentation to the VETCEN within 2 business days.

2-6. Garrison Commander
The Garrison Commander, or designated representative, will assist Campbell Crossing LLC in--

a. Establish and enforce guidelines for registration of privately owned animals residing on post.

b. Establish guidelines for the disposition of animals against which substantiated bite or repeated nuisance complaints have been made.

c. In accordance with the procedures outlined in this regulation, order/assist in the removal from the installation of any animal that poses a threat to the community, is impounded three times within a 12-month period, was involved in a biting incident, or if the owner is cited three times in a 12-month period for failure to remove unsanitary wastes.

CAM Regulation 40-7 • 08 OCT 2014
2-7. Animal owners

a. Owners are responsible for the actions of their pets and will ensure the following control measures are taken:

(1) All pets will be controlled at all times in such a manner as to prevent them from becoming a nuisance or menace to other persons, animals, or property. A nuisance is defined as an animal that causes annoyance to neighbors (prolonged barking, howling, bad odors, fighting with other animals, etc.) or damage to private or public property. The owner/sponsor of an animal kept or harbored on this installation is responsible for any and all damages to government or private property caused by his/her animal(s). All animals will be controlled to prevent them from biting or causing injury to people or animals.

(2) Animals will not be permitted to run "at large." While outside, the animal will be kept on a leash or confined within a fenced area that is maintained in such a condition that the animal cannot escape. Occupants of government quarters that possess an "outdoors" animal will have a fence, approved by Campbell Crossing LLC that covers an uninterrupted area from their quarter's entrance (back) to a designated yard. A person walking a dog must be of equal or greater weight than the dog on the leash.

(a) Animals will not be secured to government property, trees or shrubbery or left unattended outside except in a yard with a fence that meets the requirements of Campbell Crossing LLC Fencing Guidelines.

(b) Animals will not be left unattended in an enclosed space, such as a vehicle, when the temperature is either so high or low or the ventilation is inadequate as to endanger the animal's life or health. The Fort Campbell Police are authorized to take all reasonable and necessary action to remove any animal from a vehicle or other inadequate enclosure.

(c) Female animals in heat will be confined in a building or secure enclosure in such a manner that such female animal cannot come into contact with other animals.

(3) While outside, the animal will be controlled to prevent it from creating unsanitary conditions on public roads, walks, recreation areas and the yards of other individuals. Premises, enclosures, or surrounding areas where an animal is kept will be maintained in a sanitary condition to prevent fouling of the air and insect problems. Waste and feces shall be removed daily from pet owner's yard.

b. Owners are responsible for the health of their pets.

(1) Owners will ensure their pets receive adequate shelter and nutrition. Adequate shelter is defined as access to protection from sun, rain, wind, and snow. Adequate nutrition is defined as ready access to clean, fresh water and at least one meal each day. The shelter shall be a moisture-proof and windproof structure. The size must accommodate the entire body of the pet to allow it to stand up, turn around, and lie down in a natural manner. It must allow retention of body heat. The shelter must be made of durable material with a solid floor raised at least two inches from the ground. The entrance shall be covered by a flexible windproof material, self-closing swinging door, or wind baffle. (Appendix B shows an acceptable animal shelter). The structure will contain a sufficient quantity of bedding material consisting of hay, straw, cedar shavings or equivalent to provide insulation and promote retention of body heat. Outside housing for animals in Family quarters will be portable and removed when the quarters are cleared. Doghouses and/or runs should be moved periodically to prevent damage to the surrounding area. All damaged areas must be returned to original conditions upon move out or charges will be assessed.

(2) Owners will ensure pets receive all immunizations as required in appendix A, as well as having their pets tested and treated for parasites and other diseases which, in the judgment of the Installation Veterinarian, constitute a health threat to persons or other animals in the community. All dogs and cats residing on post must be microchipped. The vaccinations and microchip may be received at the Fort Campbell Veterinary Center (VETCEN) or at a civilian veterinary clinic. However, the owner must provide proof of vaccination and microchipping to the VETCEN if services are received off post.

c. All Soldiers owning pets will ensure that appropriate arrangements are made for the care of their animal during any absence (leave, TDY, deployment, etc.). The Soldier will give his/her leave information (name, rank, leave address, leave phone number, and dates of leave) and the pet-sitter's information (name, unit, and home and duty phone number) to Campbell Crossing, LLC and the Installation Veterinarian. An authorization of care form should be completed and kept on file with Ft. Campbell VETCEN to allow the pet-sitter permission to bring the animal for care within the facility. Pet-sitters that seek care for a pet at the VETCEN must be DOD ID card holders that are enrolled in DEERS and must provide a power of attorney from the pet's owner authorizing veterinary care. The Installation Veterinarian, in coordination with the Fort Campbell Police, has the authority to remove any animal from a set of quarters if there is a violation of this regulation.

CAM Regulation 40-7 • 08 OCT 2014
d. The privilege of animal ownership carries with it the responsibility for proper care and disposition of an animal when the owner departs the installation on a temporary or permanent basis. Personnel permanently departing the installation will clear the VETCEN, at which time they will be provided their pet’s health records. UNDER NO CIRCUMSTANCE WILL UNWANTED PETS BE TURNED LOOSE ON THE INSTALLATION. Owners are required to take their pets with them when they depart or to place their pets in a new home prior to departure.

(1) On Post. Owners who reside on the installation must find their pet a new home through advertising on bulletin boards, newspapers, word-of-mouth, etc. If unsuccessful in finding the animal a new home, the animal may be surrendered to the Stray Animal Impound Facility located on post with an associated surrender fee. However, in surrendering the animal over to the facility, the animal becomes the property of the Stray Animal Impound Facility. The owner will be required to sign an animal relinquishment form. The animal immediately becomes adoptable to a new owner. If the animal is not adopted within a reasonable amount of time, humane euthanasia will be performed.

(2) Off Post. All requirements as specified in paragraph 2-7d(1) above for pet owners who reside on the installation apply to personnel who reside off the installation with the exception that no animals will be accepted at the Stray Animal Impound Facility from owners who reside off post. If the owners are unsuccessful in finding the animal a new home, the pet will be turned over to an off-post animal shelter.

e. In the event of a disease outbreak, the Installation Veterinarian in accordance with AR 40-905 and/or requirements of Federal or state health officials may impose quarantine procedures.

Chapter 3
Policies Concerning Animals

3-1. Government owned animals

a. In accordance with AR 40-905, complete veterinary medical and surgical service is authorized for all Government owned animals as follows:

   (1) Military Working Dogs.
   (2) Unit mascots (established by unit orders, signed by an officer in the rank of LTC or higher)
   (3) Nonappropriated fund (NAF) animals on a space-available basis. Veterinary medical and surgical services will be paid for by the NAF entity that owns the animals and will not include grooming, food, and pet accessories.

b. Personnel living in barracks or other troop unit facilities are not allowed to keep any form of animal life in the vicinity of these quarters without permission of the unit commander.

3-2. Privately owned animals

a. Ownership and Maintenance. Ownership and maintenance of dogs or cats in Family quarters will be limited to two registered animals. Permission to house more than two pets, or pets other than those specified, will be requested in writing through the housing office as an exception to policy (ETP) for approval of the garrison commander (see example Appendix E).

b. Small Caged Pets. Maintenance of small caged animals in Family Housing is limited to 2 small caged animals in total. Examples include rodents (guinea pig, hamster, and gerbil). If a pet owner is unsure if the pet is allowable, he/she will contact their Community Office for advice.

c. Horses. Ownership of horses is permitted; the number and type as specified by the Community Recreation Division, Community Activities Business Center. Horses will be maintained and ridden only in the stable areas and on established riding trails; under no circumstances will a horse be brought into housing areas.

d. Livestock. No livestock will be maintained on post without prior approval by the Installation Veterinarian. Livestock (domestic animals normally raised as food animals), to include potbellied pigs, are NOT permitted in housing areas.

e. Exotic Pets. Exotic animals are not authorized for private ownership. Examples include reptiles, ferrets, hedgehogs, rats, potbellied pigs, monkeys, arachnids, any farm animal or wildlife. Unauthorized animals are not limited to these examples.

f. Pets in Public Buildings. Pets are not permitted in most public buildings on Fort Campbell. Assistance animals (seeing eye dogs, dogs for the hearing impaired, etc.) are permitted in public buildings and areas so long as they are on a leash or harness and in the company of their owner (40 U.S.C. Sec 291). MWDs are permitted in public buildings and areas when on official business and
accompanied by their handlers. A list of commercial boarding facilities is available to guests using transient billets or guest house facilities.

g. Certified Assistance Animals. Certified assistance animals owned by a member in the Army Exceptional Family Program are authorized the same medical and surgical care as provided for Government-owned animals. In accordance with AR 40-905, “these animals will be provided such care only as time and resources permit on a reimbursable basis.”

h. Commercial Breeding. The breeding or raising of animals on this installation for commercial (profit making) purposes is expressly prohibited. Veterinary care will be refused for any profit-making litters and may also result in loss of Pet Privileges’ and/or termination of lease.

3-3. Registration of animals

a. Owners of all dogs, cats, and horses maintained on post will register their animals with the Installation Veterinarian within three duty days after arrival. If the animal’s immunization or microchip status does not meet post requirements, an appointment will be made with the VETCEN to complete the immunizations as a part of the registration. Veterinary personnel will provide a new rabies tag to the owner for placement on the animal’s collar, and the tag must be worn by the animal any time the animal is outside the owner’s quarters. All dogs, cats, and horses maintained on the installation will be routinely immunized against rabies and issued a DD Form 2208 rabies vaccination certificate. Immunization will be according to the most recent edition of Compendium of Animal Rabies Control prepared by the National Association of State Public Health Veterinarians (NASPHV), Inc and the U.S. Army Veterinary Medical Standardization Board Vaccination Guidelines. In addition, compliance with the rabies vaccination laws and regulations of the States (Kentucky and Tennessee) is mandatory.

b. Pets will receive appropriate regular immunizations (see appendix A) to continuously validate their registration. If vaccinations are performed by off-post-civilian veterinarians, documented proof from the animal’s medical record and/or computer receipts from a veterinary clinic must be presented to the VETCEN to continuously comply with registration. Other documents will not be accepted as proof of vaccination. Vaccinations from other sources, such as “co-ops”, feed stores, or breeders will not be accepted as an approved source.

c. Small caged animals (listed in paragraph 3-2b) and fish do not require immunization.

d. All horses brought to the installation for the first time and any horse returning to the installation after an absence of 30 days or more will be quarantined. Length of quarantine is from 7 to 21 days or more, depending upon vaccination status of the horse upon entry. The length of quarantine of incoming horses is handled on a case-by-case basis by the stables manager according to current policy as established by the Installation Veterinarian. A series of vaccinations (an initial vaccination followed by one or more boosters given 2-3 weeks or more apart), followed by an additional wating period, may be required in most cases before a horse is released from quarantine. Horse owners must also present current proof (dated within 90 days of quarantine entry) of a negative test for Equine Infectious Anemia (Coggins test) upon entering a horse into quarantine. Newly-arriving horses must also provide a health certificated dated within 30 days of entry into quarantine signed by an accredited veterinarian. Horses must be dewormed with an ivermectin product upon entry into quarantine. Horses must be dewormed upon entering quarantine and then semi-annually while being boarded at Fort Campbell according to current policy as established by the Installation Veterinarian. Dewormings will be performed in the spring (between January and March) and fall (July to September). Once annually a dewormer with efficacy against equine tapeworms should be used. Fecal egg counts (FEC) should be performed quarterly and horse owners will perform additional dewormings as recommended by their veterinarian based on these counts and provide proof of the results and appropriate treatment to the stable manager. Proof of deworming is required to be presented to the stable manager within 30 days of deworming and should be available for review by Installation Veterinarian. Horses under 2 years of age must be dewormed every 8 weeks. Horses must be up to date on the required vaccinations (see Appendix A-4) upon entering quarantine, and must maintain vaccination status while being boarded at Fort Campbell, according to current policy as established by the Installation Veterinarian. Horse owners are required to submit proof of vaccination upon entering a horse into quarantine. Only vaccinations given by a licensed veterinarian will be recognized. Equine strangles titers can be accepted on a case by case basis at the discretion of the Installation Veterinarian. The vaccination schedule is determined by the Installation Veterinarian.

e. No livestock are to be maintained within the confines of the Fort Campbell reservation without prior approval from the Installation Veterinarian prior to entry onto the installation. Livestock originating from states other than Tennessee or Kentucky must be accompanied by a health certificate signed by an

CAM Regulation 40-7 • 08 OCT 2014

7
accredited veterinarian, issued not more than 30 days prior to expected entry onto post, stating the animal is free of signs of communicable disease. The animals must meet all importation requirements for those species state animal health laws. All livestock maintained on the installation will be permanently identified by affixing a metal or plastic tag to the ear of each animal (a legible tattoo registration number is also acceptable). All livestock maintained on the installation are subject to the animal health regulations of the United States Department of Agriculture, as well as the states of Tennessee and Kentucky, and the owner will ensure that each animal has been tested in accordance with these requirements.

f. Transient animals will be controlled as follows:
   (1) Personnel residing on post are responsible for pets belonging to guests (transient animals) and will ensure these pets do not pose a threat to the health or safety of the community nor causes them to exceed the authorized limit of 2 animals.
   (2) If a transient animal (dog or cat) will remain on the installation for three days or longer, it must be registered in accordance with this regulation.
   (3) Authorized sponsors of pet shows, rodeos, horse shows, field trial horses, or other activities that bring transient animals onto the installation will notify the Installation Veterinarian at least 30 days prior to the event and provide an estimate of the number and type of animals that will be participating. All dog and cat owners must be able to provide proof of current rabies vaccinations. Dog and cats owners without such proof will present their pet to the VETCEN for proper immunization. All equine will be accompanied by certification that the animal has been tested for and found negative for EIA not more than 90 days prior to arrival and proof of vaccination. All animals originating outside the states of Tennessee and Kentucky will be accompanied by a valid health certificate signed by an accredited veterinarian stating the animal meets all importation requirements of these states. The Installation Veterinarian has the authority to deny or cause removal of any animal (dog, cat, horse, mascot, etc.) determined to represent a reasonable threat to the health or safety of persons or other animals on the installation.
   g. Change of ownership procedures are as follows:
      (1) In the event an animal registered on the installation is sold or given away, the original owner is responsible for notifying the Installation Veterinarian of the change of ownership with signing of necessary paperwork within three days and the new owner is responsible for re-registration of the animal within three days at the VETCEN. In addition, the original owner must notify the manufacturer of the pet's microchip of the change in ownership. The pet will be considered the property of the original owner until its ownership is transferred by the microchip company.
      (2) If the new owner wishes to receive medical information on the pet from the original owner, the original owner must submit a letter releasing the said information to the new owner.
      (3) Restricted Breed dogs (see Appendix D) do not follow above guidelines. Restricted Breed dogs which were grandfathered in to the new policy dated 23 Jan 09 may not be transferred to a new owner.

3-4. Disposition of dead animals
   a. Owners are responsible for the disposal of deceased pets. The Fort Campbell VETCEN does dispose of dead privately-owned animals. Dead animals can be disposed of at the Convenience Center located at Airborne Street and Stillwell Road. Dead animals are not to be buried on the housing premises.
   b. Horse owners are responsible for the removal and disposal of their deceased animals in accordance with local and state regulations.
   c. Dead animals found at large on the installation (including roads) will be sanitarily disposed of by the major unit command having police responsibility for that area.
   d. Post-mortem examinations on privately owned animals will only be performed on animals involved in abuse and/or neglect cases or if mission allows.
   e. The owner or Fort Campbell Police will deliver any animal, which dies after biting and/or scratching a person, immediately to the VETCEN for appropriate laboratory examination and rabies evaluation.

3-5. Prohibition of dog fighting
   a. Training dogs on the installation to fight is prohibited.
   b. Hosting or arranging dogfights on the installation is prohibited.
   c. The ownership or possession on the installation of any equipment designed or used to train dogs to fight or hone their aggressive tendencies is expressly prohibited.

CAM Regulation 40-7 • 08 OCT 2014
Chapter 4
Actions Concerning Violations of this Regulation

4-1. Loose or stray animals
   a. The Fort Campbell Police, DPW, and contracted pest control will impound stray animals found on the installation at the Stray Animal Impound Facility. Once an animal has been seized, it cannot be released to its owner until the requirements specified in paragraph 4-1c below have been met.
   b. The Stray Animal Impound Facility will maintain the impounded animal and make reasonable efforts to identify its owner. If the owner cannot be identified and/or notified and the animal is not claimed within three duty days, it may be euthanized or adopted at the discretion of the Installation Veterinarian. Owners of missing pets should call the Stray Animal Impound Facility to ascertain whether the pet has been seized.
   c. The owner of an impounded animal may obtain its release by reporting to the Stray Animal Impound Facility during its duty hours. The animal will be released when its registration, immunizations, and microchip are up-to-date, release form is completed, and the owner pays impoundment charges (to include treatment charges, if applicable). If the animal's registration, vaccinations, and/or microchip are not up-to-date, procedures to effect these requirements will be initiated at either the VETCEN. Payment of all charges and signing of the release form will be accomplished by the owner prior to any animal leaving the Stray Animal Impound Facility.
   d. When a stray animal is presented injured or seriously ill and the owners cannot be immediately identified, the Installation Veterinarian will determine what care is needed to alleviate pain or undue suffering. Humane euthanasia may be elected if the animal is extremely sick and/or injured and considered to be suffering. Reasonable effort will be made to identify and contact the owner.

4-2. Incidents involving animal bites/scratches
   a. All animal bite/scratch incidents occurring on post will be handled in accordance with Public Health Command District - Fort Hood policies for animal bite reports, AR 40-905, MEDDAC Reg 40-5-10, and the latest edition of the Compendium of Animal Rabies Control published by the NASPHV. Any person who sustains an animal bite/scratch is to be initially evaluated and treated at the Blanchfield Army Community Hospital Emergency Center where reception desk personnel will initiate the Report of Animal Bite - Potential Rabies Exposure Form (DD Form 2341, dated October 2007, at Appendix A). Ft. Campbell VETCEN personnel will attempt to determine the identity of the biting animal's owner and the animal's rabies immunization status through telephonic communication with its owner and examination of its records. The owner will be required to present the biting animal at the VETCEN the following business day so the veterinary officer may examine the animal. Ft. Campbell VETCEN may request assistance from the Provost Marshal in cases occurring on post when the animal's examination/quarantine is required and the animal must be apprehended and impounded in the Stray Animal Impound and Rabies Quarantine Facility. A veterinarian will evaluate the animal and, depending on the animal's risk to the safety and welfare of the Fort Campbell community and rabies vaccination status, will recommend disposition of the animal to the Garrison Commander. The Garrison Commander must authorize release of the animal after impoundment or may order that the animal be removed from the installation. Animals may be quarantined in an authorized kennel facility including the Stray Animal Impound and Rabies Quarantine Facility or at home at the determination of Campbell Crossing LLC and Installation Veterinarian. If quarantined at home, a DD Form 2623 (Animal Home Quarantine) prepared by the VETCEN must be signed by the owner before home quarantine is authorized. The owner must follow strict guidelines during the quarantine period as stated by the Veterinarian. The owner will be responsible for all costs associated with quarantine. This includes any fees associated with examining the animal for signs of rabies at the VETCEN, and fees associated with quarantine of the animal at the SAIF if applicable. If any signs of illness develop, the owner must bring the animal immediately to the VETCEN. If the signs suggestive of rabies develop, the animal is euthanized and sent for rabies evaluation. After the 10-day quarantine, the animal undergoes a second physical exam by the veterinarian, and, if the pet has not shown signs of illness, it is released from quarantine. Upon release from quarantine, the animal will be vaccinated against rabies and all other required vaccinations if indicated at the cost of the owner. Rabies vaccine will only be given after the quarantine observation period.
   b. Small house-bound/caged animals need not be impounded when involved in a biting incident. However, the owner will be required to present the biting animal at the VETCEN the following day so the veterinary officer may examine the animal.

CAM Regulation 40-7 • 08 OCT 2014
c. When a wild animal or stray dog or cat is involved in a biting incident, the animal may be euthanized immediately and sent for rabies examination at the discretion of the Installation Veterinarian. The management of such cases will be in accordance with the most current version of the Compendium of Animal Rabies Control.

(1) A person bitten by a wild animal, stray dog or cat should immediately seek medical treatment at the Emergency Room and be evaluated for the need for rabies treatment.

(2) Unvaccinated dogs and cats exposed to a potentially rabid animal (wild, carnivorous animal, including bats, which are not available for testing) will be euthanized immediately. If the owner is unwilling to have the pet euthanized, the exposed animal will be quarantined and/or provided post-exposure rabies prophylaxis in accordance with the current Compendium of Animal Rabies Prevention and Control published by the National Association of State Public Health Veterinarians (NASPHV).

(3) A dog, cat, or ferret that has been exposed to rabies but which has a current rabies immunization should be reimmunized immediately, then restrained by leashing and confinement and observed for at least 45 days.

(4) Horses exposed to a rabid animal and currently vaccinated against rabies should be re-vaccinated immediately and observed for 45 days. Unvaccinated horses should be euthanized immediately. Horse owners unwilling to do this will keep the horse under close observation for six months.

4-3. Nuisance, menace, abused, or neglected Animals- see attached Pet Policy

a. Individuals with complaints of an animal that is a nuisance should first contact the animal's owner and attempt to resolve the issue. If the animal continues to be a nuisance, the Community Manager and Campbell Crossing LLC should be notified to obtain assistance. At this point the chain-of-command may also be notified to assist. If the problem is still not resolved, Campbell Crossing LLC will make a recommendation as to the disposition of the animal. Campbell Crossing LLC may request assistance from the Preventive Medicine Service and Veterinary Services when unsanitary or community health conditions are involved.

b. Complaints of animal abuse or neglect will be directed to the installation Provost Marshal Office who will then contact the Installation Veterinarian for professional appraisal of the situation. The Installation Veterinarian, or designated representative, will provide an evaluation of the animal's condition, possible or probable causes, and recommendations to correct the situation to the Installation Provost Marshal Office and Campbell Crossing LLC.

c. In substantiated cases, the animal will be removed from the neglect/abuse situation by Ft. Campbell Military Police and impounded at the Stray Animal Impound Facility while the official investigation is pursued.

d. Return of the animal to the owner is the decision of the Installation Judge Advocate, supported by Campbell Crossing LLC, Installation Provost Marshal Office and Installation Veterinarian. If animal is allowed to be returned to owner, owner had 5 working days to claim animal before animal becomes property of the Ft. Campbell Stray Impound Facility and is available for adoption. The animal will be released to the owner when registration, immunizations, and microchip are up-to-date, release form is completed, and the owner has paid associated impoundment charges.

e. Campbell Crossing LLC will determine whether to suspend the Pet Privileges of the Resident based on the recommendations of the Installation Veterinarian.

f. When warranted, Campbell Crossing LLC will send a Violation Letter through command channels to the owner of the animal involved in a nuisance or abuse/neglect incident. Campbell Crossing LLC will initiate recommendation and justification for removal. The owner may present extenuating circumstances or justification for a waiver through Campbell Crossing LLC for consideration to rescind requested action.

4-4. Animals involved in commercial breeding

a. Commercial Breeding is not allowed and can result in the occupant's loss of pet privileges and/or occupancy of home.

CAM Regulation 40-7 • 08 OCT 2014

10
4-5. Failure to remove unsanitary wastes
   a. Campbell Crossing LLC may revoke pet privileges for Residents not willing to follow waste removal guidelines as stated in the Resident Guide. Pet ownership is a privilege and failure to follow guidelines not only affects the living conditions for the animal but also the surrounding neighbors.

4-6. Non-compliance with directions to remove animals from post
Failure to remove an animal from post after being directed to do so can/may result in termination of lease agreement.

Appendix A
Immunization and Test Requirements for Privately Owned Animals Maintained on Fort Campbell

A-1. Dogs
a. Mandatory
   (1) Distemper/Parvo virus combination.
   (2) Rabies.
   (3) Internal parasites. Fecal exam with targeted deworming for puppies; annual fecal testing for adult dogs.
b. Recommended.
   (1) Heartworm test annually.
   (2) Heartworm prevention year-round.
   (3) Flea +/- tick prevention year-round
c. Recommended Schedule.
   (1) Distemper/Parvo virus combination.
      (a) Puppies: Initial immunization. All puppies should receive no less than three sets of immunizations every 3-4 weeks starting at 6-8 weeks of age until 14-16 weeks of age (the final set of immunizations should ideally be administered at 16 weeks if possible). Booster at one year later with three year vaccine product.
      (b) Adult dogs (>16 weeks): Dogs should receive a single dose. Booster with three year vaccine product one year later.
      (c) Re-immunized triennially.
   (2) Rabies.
      (a) Puppies: First immunization at > 12 weeks of age, booster at one year later with a three year vaccine product.
      (b) Adult dogs (≥ 16 weeks of age): One dose with booster at one year later with a three year vaccine product.
      (c) Re-immunized triennially.

A-2. Cats
a. Mandatory
   (1) Feline distemper combination.
   (2) Rabies.
   (3) Internal parasites. Fecal exam with targeted deworming for kittens; annual fecal testing for adult cats.
b. Recommended.
   (1) Heartworm prevention year-round.
   (2) Flea +/- tick prevention year-round
   (3) Feline leukemia virus/feline immunodeficiency virus testing annually.
   (4) Feline leukemia virus vaccination based animal lifestyle
c. Recommended Schedule.
   (1) Feline distemper combination.
      (a) Kittens: Initial immunization. All kittens should receive no less than three sets of immunizations every 3-4 weeks starting at 6-8 weeks of age until 14-16 weeks of age (the final set of immunizations should ideally be administered at 16 weeks if possible). Booster at one year later with three year vaccine.
      (b) Adult cats (1 year of age and older): Give initial immunization and booster once more in 3-4 weeks.
         Booster one year later with a three year vaccine product.
      (c) Re-immunization. Triennially
   (1) Rabies.
      (a) Kittens: First immunization at > 12 weeks of age, booster at one year later with a three year vaccine product.

CAM Regulation 40-7 • 08 OCT 2014
(b) Adult cats (≥ 16 weeks of age): One dose with booster at one year later with a three year vaccine product.  
(c) Re-immunized triennially.  
(2) Feline leukemia virus (vaccination performed based on animal lifestyle).  
(a) Initial immunization. Given to at risk animals eight weeks of age or older.  
(b) Second immunization. Administered 3-4 weeks following initial immunization.  
(c) Re-immunization. Annually.
A-3. Horses

a. Internal Parasite Control. Horses will be treated for intestinal parasites according to current policy as established by the Installation Veterinarian. Owners of privately owned horses may purchase de-worming paste from the Stables Manager prior to the scheduled day of treatment or they may have the treatment performed by a civilian veterinarian, provided the medication is of the same Family of dewormer used to treat military horses. Fecal egg counts (FEC) should be performed quarterly on all horses. Horses with FEC > 500 eggs per gram should be dewormed. All horses should be dewormed semi-annually regardless of FEC to eliminate pre-patent Strongylus vulgaris. The parasite management plan should include deworming with a product containing praziquantel to control tapeworms, given annually in the fall.

b. Mandatory Immunizations. Annual vaccination against Eastern Equine Encephalitis, Western Equine Encephalitis, West Nile Virus, Tetanus, and Rabies is required. Annual vaccination for Equine Influenza and Rhinopneumonitis is also required for government and privately-owned horses due to the population risk from the overall movement of horses on and off DoD installations. Strangles (intranasal) should be performed semi-annually due to the prevalence of disease within the area.

Recommendations for immunizations and internal parasite control is as indicated in table A-1 below:

<table>
<thead>
<tr>
<th>Template Equine Wellness Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall (AUG/SEP) – Fecal egg count (FEC), Deworm as necessary based on FEC, Vaccinate against Equine Influenza, Rhinopneumonitis, Strangles (intranasal)</td>
</tr>
<tr>
<td>Winter (NOV/DEC) – FEC, Deworm with ivermectin or moxidectin with praziquantel</td>
</tr>
<tr>
<td>Spring (FEB/MAR) – FEC, Deworm as necessary based on FEC, Vaccinate against Rabies, EEE/WEE, Tetanus, West Nile Virus, Equine Influenza and Rhinopneumonitis, Strangles (intranasal)</td>
</tr>
<tr>
<td>Summer (MAY/JUN) - FEC, Deworm with ivermectin, moxidectin, fenbendazole, pyrantel pamoate, or a combination based on FEC trends</td>
</tr>
</tbody>

Appendix B
Suggested Animal Shelter

Hinges to allow opening of top for cleaning access.

Walls composed of 1/2" plywood.

2"x4" or 4"x4" boards to lift house off the ground.

Drainage holes drilled into base.

Partition utilized for wind/weather protection.
Appendix C

Campbell Crossing LLC Pet Policy

The following constitutes the pet policy for Residents living in Campbell Crossing LLC:

- Residents are limited to a total of 2 dogs or cats per household. (For exceptions: see para 3.2a)
- Residents may not board in privatized housing exotic animals such as, but not limited to, reptiles, rodents (other than hamsters and guinea pigs), ferrets, hedgehogs, skunks, rats, raccoons, squirrels, potbellied pigs, monkeys, arachnids, or any farm animal.
- Residents may not board in privatized housing any dog of a breed (including a mixed breed) that is deemed "aggressive or potentially aggressive" unless the dog is a certified military working dog that is being boarded by its handler/trainer. For purposes of this policy, aggressive or potentially aggressive breeds of dogs are defined as Pit Bulls (American Staffordshire Bull Terriers or English Staffordshire Bull Terriers), Rottweiler’s, Doberman Pinschers, Chows, and wolf hybrids. This is not an all inclusive list.
- All cats and dogs must be registered at Fort Campbell Veterinary Services within 3 days of assignment to a CCLLC home. Cats and dogs owned by Residents must be microchipped. Cat and dog owners may be requested to provide a copy of verification of appropriate immunization along with pet registration to their CCLLC Community Management Office.
- Pet owners have the responsibility to control their pets. Unsupervised and unleashed pets are not permitted in common areas or outside privacy fences. Please note that the privacy fences installed at some CCLLC homes are not designed to contain a dog. Pets must be on a leash at all times when outside the home unless located inside an enclosed yard. Voice command is not an acceptable means of control. Pets are not allowed in playgrounds or Tot Lots at any time.
- Authorized animals are housed within the home. Garages or balconies are not suitable housing. Pets may be tethered inside a fenced yard as long as the tethered animal cannot reach the fence. Pets are required to be in the home or in an enclosed backyard if unattended. Pet houses must not be taller than the existing fencing.
- Place pet houses in the backyard within 25 feet of the rear of the home. Ensure that the structure is sound construction, inspected and approved by CCLLC personnel, neat in appearance, cleaned daily of pet waste, kept free of ticks, fleas and other parasites, enclosed in fenced area, removed prior to clearing housing, adequate shade/shelter for animal, adequate size for pet. Grass must be maintained in all pet areas. Bare areas are not allowed.
- All yards and common areas should be cleaned of pet droppings on a daily basis. Owners must pick up and properly dispose of pet droppings immediately in common areas as well as one’s own premises. This will eliminate health and sanitary concerns. Avoid leaving pet food outside for prolonged periods of time, as it will attract insects and wild animals.
- Pets must not prevent or obstruct Employees or associates of CCLLC from properly performing their functions, duties and responsibilities.
- Pets that are deemed aggressive or a nuisance are prohibited. Aggressive behavior is defined as unprovoked barking, growling or snarling at people approaching the animal, aggressively running along fence line when people are present, biting or scratching people and/or escaping confinement or restriction to chase people.
- Reports of unprovoked bites, aggressive and nuisance behavior may be cause for CCLLC to request the removal of the pet. Removal notices are on a case-by-case basis and involve a detailed review of all case histories, facts and future potential safety risks.
- CCLLC reserves the right to terminate the MPOA for those Residents failing to comply with pet removal notices.
- Abandonment of pets is prohibited.
- If a Family pet is lost you may contact the Stray Facility at 270.798.5519.
- Guide Dog regulations will have exceptions to some of the rules as defined by “Title 40, U.S.C., and Section 291”.
- Residents are required to restore grounds prior to clearing housing and are responsible for any damages caused by installation and removal of pet homes.
- Refer to CAM REG 40-7 Pet and Animal Control for more information.

CAM Regulation 40-7 • 08 OCT 2014
These policies are to be strictly observed and will be enforced by the Management staff. These policies have been set forth to ensure a quality living experience for all those living in Campbell Crossing LLC and are consistent with other Army residential privatization projects. Management reserves the right to make such other reasonable policies that may become necessary to protect the care and cleanliness of the premises and community. Failure to adhere to these guidelines may result in charges. Please refer to the CCLLC website at www.campbellcrossingllc.com for a list of potential charges applicable.

Disposal of Deceased Pets
Owners are responsible for disposing of deceased pets. Residents should call Installation Veterinary Services for proper disposal procedures. Deceased pets are not to be buried on the premises.
Appendix D

Revised Pet Policy for Privatized Housing Under the Army's Residential Communities Initiative (RCI) Privatized Program

Effective 23 January 2009, the following pet policy requirements are in effect for residents of Campbell Crossing LLC (CCLLC) in addition to those guidelines contained in Section 4 of the CCLLC Resident Guide and Community Standards Handbook.

a. Comply with all applicable state, federal and local laws and all installation specific requirements associated with the ownership, registration, control, and vaccination of pets.

b. May not board in privatized housing any dog of a breed (including a mixed breed) that is deemed "aggressive or potentially aggressive" unless the dog is a certified military working dog that is being boarded by its handler/trainer. For purposes of this policy, aggressive or potentially aggressive breeds of dogs are defined as Pit Bulls (American Staffordshire Bull Terriers or English Staffordshire Bull Terriers), Rottweiler's, Doberman Pinschers, Chows, and wolf hybrids. Prohibition also extends to other dogs that demonstrate a propensity for dominant or aggressive behavior as indicated by any of the following types of conduct:

   1) Unprovoked barking, growling, or snarling at people approaching the animal.
   2) Aggressively running along fence lines when people are present
   3) Biting or scratching people
   4) Escaping confinement or restriction to chase people

c. May not board in privatized housing exotic animals such as, but not limited to, reptiles, rodents (other than hamsters, gerbils and guinea pigs), ferrets, hedgehogs, skunks, rats, raccoons, squirrels, pot bellied pigs, monkeys, arachnids, or any farm animal.

Residents of CCLLC that are currently boarding pets prohibited by this policy may continue to board the pet until they vacate CCLLC homes unless the pet demonstrates a propensity for dominant or aggressive behavior as indicated above.

CCLLC reserves the right to:

1. Determine additional requirements for tenant liability insurance.
2. Terminate tenant lease for failure to remove aggressive or unruly pets.
3. Assess pet deposits/additional charges for damages that exceed deposit amount.
4. Grant exceptions to this Pet Policy, after validation from US-Army Garrison Fort Campbell that the exception does not conflict with existing Army policy for installations.

CAM Regulation 40-7 • 08 OCT 2014
MEMORANDUM FOR

SUBJECT: Request for Exception to Housing Policy

1. I request exception to policy of CAM Reg 40-7 and Campbell Crossing, LLC Pet Policy to house more than two pets, or pets other than those specified.

2. All pets are registered with Ft. Campbell Veterinary Center (VETCEN) and Campbell Crossing, LLC. All pets are microchipped and compliant with immunization and test requirements for privately owned animals maintained on Fort Campbell installation per CAM Reg 40-7 Appendix A and Campbell Crossing, LLC Pet Policy.

3. Provide your contact information (duty and/or home phone numbers and email address).
